

Logical Thinking

Logical thinking helps programmers work out the instructions needed to make sure a program works.

SOLUTION

4x4 Sudoku

Fill in the grid so that each row AND each column **AND each corner box of four squares** contains the numbers: 1, 2, 3 and 4 once and only once.

HINT: Find a row with more than one number already filled in. Check if numbers in the columns block what numbers could be in the gaps.

Tick the circle when you have attempted the puzzle and so practised the skill.

Skill:
Logical
Thinking

4	2	1	3
3	1	4	2
2	4	3	1
1	3	2	4
