

Digital Images

A picture can be stored in a computer by breaking it up into lots of small squares called pixels. The colour of each pixel is stored as a number.

Pixel Puzzle

SOLUTION

Recreate this halloween picture by colouring each pixel as given by its number. Look up the colour for each number in the key. For example, colour pixels marked 0 in black, and pixels marked 1 in red.

KEY

Why not create your own halloween pixel puzzle picture?

Early computer images (icons) were actually designed on 16x16 grids just like this one.
